Our HIV Care Program (HCP) is funded by the federal Ryan White program (Part B). HCP is part of a comprehensive system of care that includes medical coverage and essential support services for people living with HIV who are low income and uninsured or under-insured. HCP seeks to improve the quality, availability, and organization of HIV health care and support services in California.

### Our Services

Services at Stanislaus County include outpatient medical care coverage, case management, guidance counseling, substance use and mental health referrals, health education, housing assistance referrals, some transportation services and some supplemental nutrition assistance.
