This graph shows the daily number of unique COVID-19 confirmed positive cases reported among Stanislaus County residents by the case's episode date. The episode date is the earliest date a person is known to have the virus and is determined using a few variables including symptom onset date and the date they were tested.

Note: Due to delays in specimen processing, totals for the past two weeks may be incomplete.

Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

Note: Due to delays in death reporting and assessment, totals for the past two weeks may be incomplete.
 Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

The graph below shows positive case rate (number of positive cases per 100,000 county population), 7-day average with 7 day lag, through the report week. This does not include the state adjustments and may vary from state measures.

The graph below shows testing positivity (percent of tests that are positive), 7-day average with 7-day lag, through the report week. This may vary from state measures.

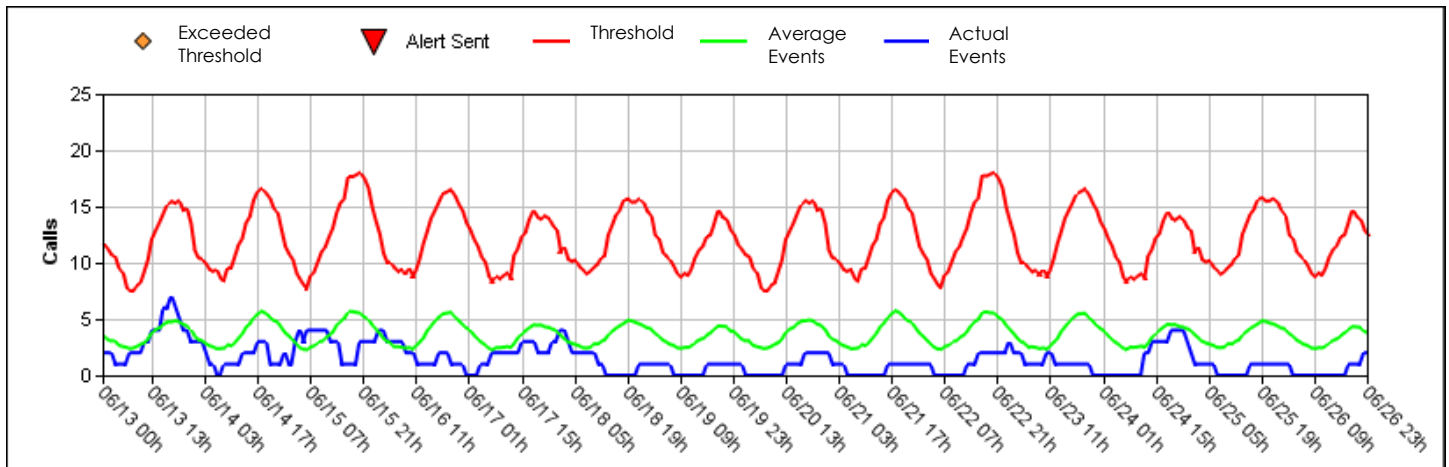

COMMUNITY MONITORING – EMERGENCY CASES COVID-19 LIKE ILLNESS

This graph shows the number of emergency room visits for COVID-19-like illness for all Stanislaus County Hospitals.

Mountain Valley EMS COVID-19 Responses

This graph shows the ambulance calls (blue) for COVID-19 related situations compared to the threshold of concern (red).
