

Overview

- COVID-19 cases, percentage of positive tests and COVID-19 -related Emergency Department visits have been stable.
- Influenza and RSV related Emergency Department visits have been sporadic.
- In Turlock, wastewater surveillance indicates a decline in COVID-19 levels and sporadic activity for influenza and RSV.

COVID-19 MONITORING

Age	Report Weeks			Fiscal Year: 25/26		
	Case Count	%	Case Rate	Case Count	%	Case Rate*
0-17	2	15.4%	0.01	467	23.4%	3.13
18-44	2	15.4%	0.01	563	28.3%	2.69
45-64	3	23.1%	0.02	417	20.9%	3.23
65+	6	46.2%	0.08	545	27.2%	7.33
Total	13	-	-	1,992	-	-

Note: Rate per 1,000 population; Data Source: Population Estimates used for case rate calculations are from the California Department of Finance. Fiscal Year is from July 1, 2025, through June 30, 2026.

This graph displays the number of confirmed COVID-19 cases by month & year, reported to the public health department among Stanislaus County residents based on episode date.

Note: Due to delays in specimen processing, data may be incomplete. Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

The graph below shows COVID-19 deaths among Stanislaus County residents by year.

Note: Due to delays in death reporting and assessment, data may be incomplete. Years with deaths below 10 will not be shown.

Reported COVID-19 cases and deaths on this page are those that have been confirmed by Stanislaus County Public Health.

The graph below shows the positive case rate (number of positive cases per 100,000 county population), a 7-day average with a 7-day lag through the report week. It does not include the state adjustments and may vary from state measures.

The graph below shows testing positivity (percent of positive tests), a 7-day average with a 7-day lag, through the report weeks. It may vary from state measures.

COMMUNITY MONITORING – EMERGENCY DEPARTMENT CASES

The graph below shows the daily case counts of emergency room visits for COVID-19, RSV and Influenza like illnesses for all Stanislaus County Hospitals.

SEVERE INFLUENZA

The chart below shows the number of people who are in the intensive care unit and deaths for children under 18 from influenza.

	Report Weeks	This Influenza Year
Intensive Care Unit	1	2
Death under 18 years old	0	0

Note: The influenza year begins MMWR week 40, this year beginning on September 28, 2025.

Laboratory detections of respiratory viruses other than COVID-19

The chart below looks at how many samples were tested for different kinds of influenza-like illness by the regional San Joaquin Public Health Laboratory (including Stanislaus County specimens), during the report weeks, and how many were positive, in order to monitor what is currently spreading in the area.

	Report Weeks		This Influenza Year	
	Samples Tested	Positive Tests	Samples Tested	Positive Tests
Influenza A	5	5	25	24
Influenza B	0	0	25	0
RSV	60	3	198	8
Parainfluenza	60	1	198	11
Adenovirus	60	1	198	4
Rhinovirus/Enterovirus	60	10	198	56
Human Metapneumovirus	60	7	198	13

Note: Table reference reflects the San Joaquin Public health lab testing numbers.
