“Vaccination is the best way to protect ourselves from COVID-19. We welcome the news of the expansion of the Pfizer vaccine FDA authorization to adolescents ages 12 to 15,” said Dr. Julie Vaishampayan, Stanislaus County Public Health Officer. “We cannot stress enough the importance of getting vaccinated to protect yourself and your family and strongly encourage parents and guardians to have those 12 and over vaccinated quickly, so the kids can get back to some form of normalcy.”

From March 1, 2020 through April 30, 2021, approximately 3,602 COVID-19 cases in individuals 12 to 17 years of age have been reported to Public Health. In the past two months, Stanislaus County Public Health confirmed 620 cases of COVID-19 in schools with 69% of those cases amongst students. This resulted in 287 quarantines that impacted 2,008 staff and 4,381 students. Additionally, 25 school sports team were quarantined due to a positive case. There were 4 clusters and 3 outbreaks linked to sports. Vaccination is key to keeping our students learning and engaging in other school-based activities without interruption.

MORE

The Pfizer-BioNTech COVID-19 Vaccine is administered as a series of two doses, three weeks apart. Parents or guardians need to be present with their child for vaccination. For additional questions, please call the COVID-19 call center at 209-558-7535.

Vaccines are available by appointments or walk-ins. Community members are encouraged to visit [MyTurn.ca.gov](https://myturn.ca.gov) or call 1-833-540-0473 to find the nearest vaccination site, if they choose to make an appointment. Vaccinations are always free and open to those who live and work in Stanislaus County regardless of immigration status.
